

ERRATA:

At the request of the authors of the paper "Variations in the chemical composition of the essential oil of *Lavandula angustifolia* Mill., Moldoveanca 4 Romanian variety", published in Rev. Chim. 71 (7), pp. 307-315, 2020 <https://doi.org/10.37358/RC.20.7.8249>

„From an unfortunate error, the term “Romanian” appears in the title of the article. This variety being registered in the Official Catalog of Cultivated Varieties in Romania, ISTIS, Ministry of Agriculture and Rural Development, the authors considered it to be Romanian. Subsequently, they found out that the lavender variety "Moldoveanca 4" is created, patented and registered in the Catalog of plant varieties of the Republic of Moldova and at UPOV with the code MD, originator of the variety being the Institute of Genetics Physiology and Plant Protection of the Republic of Moldova. Consequently, the authors apologise for the error committed without their will and in absolute respect for the authors of the patent and their work.”
